

VCI Products

July 2023

Protect your materials from corrosion with Boxon's VCI (Volatile Corrosion Inhibitor) products

As a leading company, we offer high-quality VCI products specifically designed to protect metal components from corrosion and extend the life of vehicles. . With our in-depth expertise and years of experience, we understand the unique requirements of the automotive industry and provide customized VCI products that meet the highest standards. Learn more about our extensive range and discover how Boxon can help you prevent corrosion and provide optimum protection for your products. If you need a customized solution, feel free to contact your account manager.

Our products:

1 Hood BoxCor®

Our high-concentration VCI Full Pallet Cover is specifically designed for pallets with a variable number of stacking frames. Each roll contains 25 pallet covers. The VCI protection evaporates from the packaging material, creating an invisible layer on the metal surface that safeguards against corrosion for up to 5 years. Once unpacked, the protection dissipates immediately, allowing the parts to be used directly without the need for washing or degreasing.

2 Bag BoxCor®

Our high-quality bags can be securely sealed either with BoxCor® VCI tape or by welding. To ensure optimal product presentation, there are some important points to consider during packaging.

Make sure that the components to be packaged are clean and dry. Use gloves to avoid fingerprints on the parts being protected. When packaging, ensure that both the components and the surrounding air have the same temperature to prevent condensation. Avoid any contact between the packaged components and organic materials.

3 Absorpole

Absorpole is a moisture-absorbing rod that is placed in the corrugation of shipping containers, effectively preventing condensation and reducing moisture. For a 20-foot container, it is recommended to use 4-8 rods, depending on the length of the transport and temperature fluctuations.

Fitting to Volvo V-Assortment

Article	Name	Fitting Assortment
111760	Hood BoxCor L6 1250/850x1800x0,1mm	V84 / V85
111758	Hood BoxCor L3 1250/850x1400x0,1mm	V82 / V83
